

Year 3 Spring 1 Home learning menu

Please encourage your child to choose one of the home learning tasks below. These are tasks which link with our classroom learning this half term and your child should choose to do one alongside their regular reading, Mathletics and TT Rockstars.

Please ask if you need any support with these. This project is due in on Wednesday 9th February. You can bring in the homework or email in pictures via the class email address

<i>Tell us a myth or a legend</i>	<i>London</i>	<i>Have fun with shapes</i>
<p>We are really enjoying our learning about myths and legends. You can choose to find out about a <u>myth or legend</u> of your own choice. It might be a book you have read or a film that you have watched.</p> <p>You need to write it out beautifully and decorate it. You could choose to make it into a book.</p>	<p>This term we will be learning about London and how it has changed over time. We would like you to choose an event that has happened in London and do some research of your own about it.</p> <p>You can present your research as a poster or a non-chronological report. You could even choose to tell us about it using a 3d model but you must tell us about the event linked to it.</p>	<p>We have been learning about shapes. We would like you to create a picture or model using a range of shapes (you can choose whether to include 2d or 3d shapes). The picture or model can be of anything you choose but you need to tell us all of the shapes that you have used in order to create it.</p>
