Maths at Home - LOCKDOWN 3.0

Dear Parents and Carers,

Recently, I have been asked by parents and teachers for more Maths work that is challenging for children when they're finished with their Maths remote learning set by their Class Teacher. Here, I have a list of additional resources that can engage children in a variety of ways. In addition, these resources can create informal opportunities to teach Maths at home.

Maths at Home booklet –

The Maths at home booklet pdf version is available using the following link –

<https://www.cambslearntogether.co.uk/home-learning/maths>

There is advice and games for parents and carers, to support children with learning number facts in fun ways and developing fluency and reasoning conversations.

Home Learning Hub:

<https://cambslearntogether.co.uk/home-learning/maths>

The home learning hub was created at the start of the last lockdown and contains many pages, one for each area of the curriculum. The Maths page contains links to external websites which have been chosen for their high quality content. There's also a page dedicated to **Maths challenges** which have been created by the Cambridge Maths team. These are free to access and the resources can be downloaded with their answers. There are activities for Key Stage 1, Key Stage 2 and there's also some challenges that might stretch parents as well.

Cambridge Maths Hub:

<https://cambridgemathshub.org/primary-resources>

Further, I'd like to highlight Primary resources page on Cambridge Maths Hub website. If you follow the link to the Maths Hub website, it will take you to a page with specific year groups. On each page there are links for activities and the activities have a description saying which resources the children will need to hand.

Cambs Maths Team on Facebook

Alternatively, if you are looking for something different, why not check out Cambs Maths team facebook page. On there, you'll find **Weekly Challenges**, **Maths Eyes**, estimation and much more for the parents to try with your children at home.

All of these resources are free to access and use. I hope you enjoy using these Maths resources with your children.

Best wishes

Mrs Khan-Blacker (Maths Subject Lead)
